Ok

Side note, the AOC-1 DNAPL Report is interesting.

In reference to the above referenced report, the only comment I will provide this afternoon is how they present the soil data results in the tables. For some borings, the results are provide shallow to deep and in the next boring the results are provided deep to shallow.

I have no issues other than the PFAS IA study and the solar panels on A&B Landfill.

Subject: Chemours Chambers Works Quarterly meeting

Good morning,

RE: it is getting to be that time again, Quarterly meeting for Chambers Works is scheduled for the 2nd.

If you are thinking “did not we just have a quarterly meeting”, yes you are correct. The last quarterly meeting was October 7, 2021, which was rescheduled from September 2021.

Do you have an issue that you would like addressed on the 2nd? Due to us having a meeting not too long ago, I do not anticipate much has changed from the prior meeting.

For the quarterly meeting, I will peruse the November 16, 2021 Phase 1 DNAPL Investigation Report to determine what work was completed as well as what are the results of the work completed.

Helen
